In the Months Without an E.

Gayly the oyster
Opens his shell,
Murmuring gladly,
"Now all is well!"
In the bright summer
No one may care
For broiled or for roasted,
Juicy and rare.

Now then the chicken,
Hatched in the spring,
Sadly concealed
His head with his wing;
Full well he knoweth
That while oysters rest,
Broiled little chickens
Are at their best.

—N. Y. Sun.

An Arizona Bonanza.

There is now on exhibition in the basement in the rear of the San Francisco Stock Exchange, Pine street, seven tons of ore from the Stonewall Jackson ledge, (of the McMillan Mining Company), Arizona. The ore runs from \$10,000 to \$20,000 to the ton and is the richest ever exhibited in San Francisco. Professor Martin is the President of the McMillan Mining Company and Judge Overton of Santa Rosa, one of the principal owners. Evidently the stockholders of the Stonewall Jackson have struck a bonanza. By the by would it not be a good idea to devote the rear basement of the exchange to the permanent display of our mineral wealth? Visitors could then have an opportunity of seeing specimens of the ore of every mine in the market, and in time the collection in an industrial sense, would be far more useful than any to be found in museum collections. —S. F. Stock Report.

Sir W. Thompson's soundings of the Atlantic, by means of the apparatus on board the Challenger, showed that the great ocean has three immense basins, viz. one extending from Ireland to the upper North American coast, with an average depth of 3,000 fathoms, one dividing Europe and Central America with an average depth of 3,000 fathoms; and one running from South Africa to South America with an average depth of 2,500 fathoms.

Of two monks living together in the same house in Catania, Sicily, one remained out recently rather late. The erring brother was recognized by a robber, who immediately went to the house and was admitted by the stay-at-home monk, over whose mouth he tried to put a gag; but he overdid the job by letting his finger slide in too. The finger was bitten clean off, and preserved by the monk as corroborative testimony.

A growth of human hair, the longest on record, is among the curiosities to be seen at the Paris Exposition. It came from the head of a Norman girl, Memoir by name, who lived with her mother in the extreme poverty. It is seven feet long, of an exquisite golden color, luxuriant and silky.

George Kaufman believes that men should not seek to improve on nature, God made the world for us to inhabit, and it is sacrilegious not to accept all things just as He fashions them. Therefore Kaufman sleeps in a hollow tree near Dallas, Texas, wears no clothing, and eats uncooked meat and vegetables.

The proposal to block up the Straits of Belle Isle with the view of shutting out a vast ice-bearing force of water, whose chilling influences are felt far inland in the lower portion of the Dominion, excites great interest in Canada.

The Rev. Jesse H. Moore, pastor of a Methodist church in Decatur, Ill., announced from his pulpit that for twenty years he had been preaching doctrines that he did not believe. Mr. Moore has been a Brigadier-General and a member of Congress.

It is reported that parties of miners from Nevada are on their way to Arizona.

Items from the Enterprise:—Salt

River valley, Maricopa county, will this year, produce in the neighborhood of thirteen million pounds of wheat and barley, also sweet potatoes and other vegetables, fruit, etc. This being the case, we see no reason why the grain crop of the entire Territory cannot be estimated at 30,000,000 pounds.

The Yuma Sentinel believes the railroad has benefited the Territory. We think so, too. It has benefitted the Territory in that it has transported passengers and freight faster than they used to be transported. It has injured the Territory by crowding of the vessels which used to navigate the gulf and ocean between the mouth of the Colorado and San Francisco. They were purchased and sent elsewhere by the so-called "monopoly." Had they remained on, we should have had "competition" and cheaper rates to and from the Territory.

As Mr. Taylor and Jack McAllister were en route to Gilbert, to subpoena witnesses in the stage robbery case, a couple of days ago, some person or persons, hid in the brush, fired at them with a rifle while they were passing down the cañon below Antelope, and the bullet came so close to them that no grass grew under their horses as they went on their way. There has been considerable talk about shooting, killing, etc., in this matter, and if it is a fact that the people's witnesses are in danger, it is time something of a stringent character was fixed upon, and perhaps it would be well not to await the slowness and uncertainty of courts, for the persons so endangered are no volunteers, but have been forced to perform the part they have taken in the matter.

Mr. Pierce tells us that between 300 and 400 families will leave Utah to settle on the Little Colorado this fall. There are now few Mormon settlements on this river.

Pinal county has a bright future. Mines are being sold, mills are constantly going up, her crop prospects are good and prosperity beams everywhere.

In the Probate Court, May 29th, the will of Coles Bashford was admitted to probate, and W. C. Bashford appointed administrator. The estate is valued at about \$100,000 and is conveyed by testator to his heirs.

In the stage robbery case, this morning, the prosecution completed their evidence, and the Court took a recess until 3 o'clock p. m. Prior to the adjournment counsel for defendants moved that they be discharged, on the ground that there was not sufficient evidence to hold them over. Upon the reassembling at 3 p. m., the Commissioner sustained the above motion so far as Kirby was concerned, and overruled so far as it related to Swilling. Kirby was turned over at once by the Marshal to the Sheriff to appear in the Territorial case.

Busy tongues are accusing some well-to-do people of being concerned with the active robbers. The matter needs thorough prospecting.

The Senate Committee on Private Land Claims has authorized Edmunds to report a bill providing for the submission to the United States Courts in New Mexico, Arizona, Nevada and Colorado of all private land claims growing out of grants from Spain and Mexico prior to the acquisition of that territory by the United States. The bill gives the right of appeal to the Supreme Court of the States and United States.

The courts have decided, in the case of Brigham Young's will, that the property belonging to the Mormon Church shall be paid back. It seems he invested the funds of the church in his own name, and as his own property, and distributed by will to his heirs. This decision will reduce their portion about \$750,000. It is said that there are growing signs of disaffection and dissension among the Mormons throughout the Territory.

Did the gold bugs predict anything during the silver discussion that has come to pass?

Items from the Sentinel:—The

Silver District is still highly spoken of. There is quite a pile of ore lying on the river bank a few miles above the Barriers. We hope to be able to give some account of this District next week.

Two six horse teams and one two horse team, accompanied by several saddle horses arrived here yesterday. There are four families and about a dozen men, all farmers from Tulare county, California, going to settle in Phoenix. They are well supplied with tools and household goods and bring with them some splendid stock. Good news for Phoenix.

The Star of May 30th says: R. C. Kerens, of the Stage Line, is coming this way through New Mexico, inspecting the line. At the Texas end of the route there has been sad havoc played with stage drivers, express boxes and mail bags. Ten drivers have been killed during this month from Stockton to Davis.

An Epsom salts mine has been discovered about twelve miles from Chattanooga, Tenn. The deposit is two feet thick, and is easy of access. It is pure, and only requires crushing to make it marketable.

On May 8, between the hours of 11 A. M. and 3:30 P. M., a mirage was visible in Abington, Mass., plainly showing Nantasket Beach, the surrounding hills, buildings and vessels; also the greater part of Cape Cod.

At a recent sale of autographs in London, Johnson's signature to a receipt went for only three guineas, though such a document must have been rare indeed, for the Doctor was, according to Boswell, in the habit of forgetting the names of the subscribers to his books, and spending the money, so that it is not likely he was very fond of giving receipts for it.

Amendment providing for the transfer of the Indian Bureau to the War Department, also prohibiting the use of troops for civil purpose, unless specially authorized by act of Congress, agreed to and passed the House.

The Mining and Scientific Press of this city estimates the bullion yield for the year at \$100,000,000. Judging from present indications and especially from the rapid development of the mines of Arizona, we are inclined to think it will exceed this figure. —S. F. Stock Report.

Russia's conquest of Turkey is said by the London times to have already cost her one hundred million pounds, or about one-half the cost of our late four-years' war. "Money is the sinews of war." It is this now universally acknowledged fact which compels the czar to hesitate long and study the case carefully before taking up the gauntlet England has thrown down. If the Russian treasury were well filled or Russian credit first-class, the great military bill would have opened on the arrival of the British circular at St. Petersburg. With an empty treasury and a credit hardly third-class, the most successful war may end in national bankruptcy.

Beecher was interviewed the other day, and as he smiled a sweet, sad smile said:

"Really the punishment of Theodore and Elizabeth is greater than I would they should endure. Adam and Saphira were struck dead for their lying, but these two are to live together again. God pity them both!" Then he looked at a fly crawling up his leg from the knee, brushed it off, and gazed out the window at a rooster digging worms for two or three hens and sadly said: "There is liberty even divines have not yet reached."

An Exchange has this to say: In Arizona there are four men to one woman, and a church sociable looks like the last street car from the bear garden.

The chap who wrote that has been there.
